

## Scaled Agile Framework (SAFe) Release Train Intern

### Why Join Us?

Support Compassion's Agile Release Train charged with the delivery of software and hardware solution to Compassion staff worldwide.

### You will:

- Support the Release Train Engineer in charge of the Program level of the SAFe model assisting in strategic planning and execution of 10 weeks of work across 11 delivery teams, coordinating with both a systems team and architecture team.
- Assist in preparing for Program Increment (PI) Planning events – 150 individuals divided into 11-15 teams cross-domain planning for 10 weeks
- Teach a SAFe Foundations class, and support other teaching opportunities (modular teaching)
- Support Scrum Masters in the daily execution of Sprints and removing impediments at a program level
- Participate in all SAFe/Scrum ceremonies (Daily Standup, Iteration Planning, Iteration Demo, Retrospective, Scrum of Scrums, ART Sync, PI Planning, and Backlog Refinement)

### You have:

- Knowledge of Agile Software Development methodologies (Scrum, XP, Kanban or other Agile methods)
- Awareness of the Scaled Agile Framework ([scaledagileframework.com](http://scaledagileframework.com)) or other methods to Scale Agile methodologies.
- Organizational understanding that drives you to seek collaboration
- Strong communication skills, attention to detail, and facilitation skills
- Ability to encourage and grow teams with a focus on developing individuals
- Ability to take direction and work independently on assigned tasks

### You study:

- Information Technology, Project/Program Management, Business Administration, Communication
